Risk Profile

Moderate-High Risk

This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long term investment returns could therefore be higher than a medium risk portfolio. Where the asset allocation contained in this MDD reflects offshore exposure, the portfolio is exposed to currency risks. The portfolio is exposed to equity as well as default and interest rate risks. Therefore, it is suitable for medium to long term investment horizons.

Annualised return is the weighted average compound growth rate over the period measured.

Fund Objective

The Saffron BCI Flexible Fund is a flexible portfolio that aims to deliver a high long-term total return by investing across asset classes.

Investment Policy

The portfolio may invest in equity securities, interest bearing securities, property shares, property related securities, preference shares, money market instruments, non-equity securities, notes and assets in liquid form. The portfolio may also invest in participatory interests and other forms of participation in portfolios of collective investment schemes. The portfolio may from time to time invest in listed and unlisted financial instruments. The manager may also include forward currency, interest rate and exchange rate swap transactions for efficient portfolio management purposes.

Information & Disclosures

Additional information, including application forms, annual or quarterly reports can be obtained from BCI, free of charge or can be accessed on our website www.bcis.co.za.

Valuation takes place daily and prices can be viewed on our website (www.bcis.co.za) or in the daily newspaper.

Actual annual performance figures are available to existing investors on request.

Upon request the Manager will provide the investor with portfolio quarterly investment holdings reports.

* Monthly Fixed Admin Fee

R15 excl. VAT which will apply to all direct investor accounts with balances of less than R100 000 at month end, unless an investor transacts online, in which case no such fee will be levied.

** Total Expense Ratio (TER)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction Costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The prior year ("PY") TER and Transaction cost calculations are based upon the portfolio's direct costs for the financial year ended 30 June 2022, whilst the underlying portfolios' ratio and cost calculations are based upon their most recent published figures, being 30 June 2022.

Risks

Certain investments - including those involving futures, options, equity swaps, and other derivatives may give rise to substantial risk and might not be suitable for all investors. Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information.

Effective Annual Cost

Boutique Collective Investments adopted the ASISA Standard on Effective Annual Cost ("EAC"). The EAC measure allows you to compare charges on your investments as well as their impact on your investment returns prior to investing. For further information regarding the ASISA Standard on Effective Annual Cost and access to the EAC calculator please visit our website at www.bcis.co.za. BCI calculates the EAC as per the ASISA standard for a period of 3 years up till the most recent TER reporting period.

FAIS Conflict of Interest Disclosure

Please note that your financial advisor may be a related party to the co-naming partner and/or BCI. It is your financial advisor's responsibility to disclose all fees he/she receives from any related party. The portfolio's TER includes all fees paid by portfolio to BCI, the trustees, the auditors, banks, the co-naming partner, underlying portfolios, and any other investment consultants/managers as well as distribution fees and LISP rebates, if applicable. The portfolio's performance numbers are calculated net of the TER expenses. The investment manager earns a portion of the service charge and performance fees where applicable. In some instances, portfolios invest in other portfolios which form part of the BCI Scheme. These investments will be detailed in this document, as applicable.

Disclaimer

Boutique Collective Investments (RF) (Pty) Ltd ("BCI") is a registered Manager of the Boutique Collective Investments Scheme, approved in terms of the Collective Investments Schemes Control Act, No 45 of 2002 and is a full member of the Association for Savings and Investment SA.

Collective Investment Schemes in securities are generally medium to long term investments. The value of participatory interests may go up or down and past performance is not necessarily an indication of future performance. The Manager does not guarantee the capital or the return of a portfolio. Collective Investments are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees, charges and maximum commissions is available on request. BCI reserves the right to close the portfolio to new investors and reopen certain portfolios from time to time in order to manage them more efficiently. Additional information, including application forms, annual or quarterly reports can be obtained from BCI, free of charge.

Performance figures quoted for the portfolio is from Morningstar, as at the date of this document for a lump sum investment, using NAV-NAV with income reinvested and do not take any upfront manager's charge into account. Income distributions are declared on the ex-dividend date. Actual investment performance will differ based on the initial fees charge applicable, the actual investment date, the date of reinvestment and dividend withholding tax.

Investments in foreign securities may include additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information.

Boutique Collective Investments (RF) Pty Ltd retains full legal responsibility for the third party named portfolio.

Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, BCI does not accept any responsibility for any claim, damages, loss or expense, however it arises, out of or in connection with the information in this document, whether by a client, investor or intermediary. This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of BCI/the Manager's products.

Access the BCI Privacy Policy and the BCI Terms and Conditions on the BCI website (www.bcis.co.za).

Custodian / Trustee Information

The Standard Bank of South Africa Ltd

Tel: +27 (21) 441 4100

2022's third quarter was marked by continued risk aversion on the back of hawkish global central bank sentiment, Global recession fears continue to limit growth expectations. The US dollar was the only real risk haven. The DXY index returned 6.64% over the quarter as investors worldwide grew increasingly pessimistic.

The South African business environment continues to be mixed. Inflationary pressures might begin to cool off as some input costs decreased in the middle of the quarter, however the initiation of the Transnet strike will likely curtail the continued recovery of many companies, with logistics hampered in both the delivery of inputs and finished products. Of further domestic concern is the research report commissioned by Business Leadership SA that found that there is an 85% chance that South Africa will be placed on a global greylist by February 2023. The immediate impact will be an increase in the risk category for all South African clients (individuals and entities) at many international financial institutions, particularly those in the EU and UK. Aside from the additional administrative burden in transacting with offshore entities, the impact is likely to manifest in higher risk premia payable by South African entities and is expected to detract from growth in the range of 1% - 3% of GDP, depending on the time taken by SA to meet the global FATF (Financial Action Task Force) requirements. The SARB continued in step with other central banks, raising rates twice in the quarter from 4.75% to 6.25% for a total increase of 150bp in this rate hiking cycle.

The JSE provided a modicum of safety over the quarter, with the All-Share Index (-2.95% in ZAR) outperforming the Dow Jones Industrial Index (-7.63% USD) and the FTSE100 (-3.83% USD), while large caps in Australia proved a relative haven, with the AS51 only losing 1% (AUD) for the quarter. Globally, the Shenzhen 300 was hit hard amidst extended COVID lockdowns in China, returning -14.82% (CY) for the quarter.

Returns across asset classes were varied. The All-Bond Index returned a loss only -0.07%, providing some relief to South African investors. The worst performing asset class was equity, with property returning a slightly more muted loss of -2.01%.

The JSE's heavy resource weighting can be given credit for the slight outperformance, with stabilizing commodity prices providing support for the RESI index. The RESI20 returned -1.66% over the quarter as the best performing sector, while financials had the most difficult quarter.

Local listed property continues to be a possibly enticing prospect, with the JSAPY currently trading at a PE of 6.9 and a dividend yield of 9.3, against 7.1 and 8.9 at the beginning of the quarter. The larger cap REITs remain quite exposed to office, which hasn't fully recovered since the pandemic, and the recessionary fears will likely drive valuations of retail property lower too. This could provide mispricing and value in the future.

Domestic equities saw continued decline, with hardly any bright spots on the JSE. Notably, some large-cap stocks have seen their prices decline to relatively attractive levels. MTN continued its decline, losing 12% in price terms over the quarter, while Kumba Iron Ore was the worst performer in large caps, losing 24% on the back of lower commodity prices. We also saw Discovery perform poorly due to a negative outlook, despite high earnings.

The Saffron BCI Flexible Fund outperformed the All-Share Index for the quarter, returning -2.66% vs -4.73%, representing outperformance of 2.07% over the market. The benchmark return of the ASISA category average was 0.33% for the quarter.

Going forward, the fund will continue seek opportunities entry to right entry point into pockets of value where quality companies are affected by short-term market volatility. Local sovereign bond yields continue to be attractive whilst and domestic credit spreads remain at expensive levels. The fund retains large cash or near cash balances for deployment as the global risk backdrop improves.
